

INUVIKA IN THE ENTERPRISE

OPEN VIRTUAL DESKTOP ENTERPRISE

The cross platform solution for virtual apps and desktops

It's a well established fact that the one-size-fits-all approach to delivering applications is inflexible and costly. Consumerization of IT and bring-your-own-device are established trends and transforming the way people access information. Having the freedom to work on the device of choice though, is just one of the demands that IT has to satisfy along with flexible working directives, mobility, security, data compliance and many others. A successful business is one that can readily adapt to these new demands and embrace new ways of working. The challenge for IT is to deliver solutions that satisfy these demands within their existing budget.

HOW CAN INUVIKA HELP?

Inuvika helps enterprise organizations respond to these challenges by providing a secure, efficient and flexible infrastructure that enables IT to transform the way it delivers and manages apps. Inuvika technology enables businesses to reduce the complexity and therefore the overheads associated with traditional delivery methods.

WHAT IS OPEN VIRTUAL DESKTOP?

Inuvika Open Virtual Desktop (OVD) is an app virtualization platform. It enables seamless integration and secure delivery of apps hosted on Windows and Linux server platforms and native web based apps. Users can securely connect to virtual apps and desktop sessions from any client based on Windows, Linux, MacOS, Android and IOS.

AVAILABILITY

Open Virtual Desktop Enterprise is available through the Inuvika Subscription Program. With annual or multi-year plans it entitles deployment and use of OVD Enterprise and provides software maintenance services that deliver new software releases and updates to give you security and peace of mind. Subscriptions Agreements are available for purchase on a concurrently connected user (CCU) basis.

KEY BENEFITS

Deliver any application—Windows, Linux or web

Deliver virtual desktops—Windows RDSH and Linux hosted desktop sessions

Seamless access from any device—Windows, Linux, Mac, iOS, Android
